Longpela Expertise.

Mainframe expertise at your fingertips.

Longpela Expertise are an Australian based mainframe consultancy company. We are Systems Programmers with over 18 years experience in IBM System z mainframes, z/OS, IMS DB2, CICS and mainframe networks.

Who We Are

At Longpela Expertise, we are 'old fashioned' System z mainframe Systems Programmers. We program in Assembler, we read dumps, we get into the 'internals' of what we work on.

We have over 18 years experience in almost all aspects of mainframe operations and management, software development and systems administration.

We know:

- IBM System z mainframes.
- z/OS and associated systems software.
- CICS, IMS and DB2 administration
- CICS, IMS, Netview and TSO/ISPF software development and programming
- Programming in Assembler, C, COBOL, PL/1, SAS and REXX.

We provide:

- Consulting Services
- Training

> "...we are 'old-fashioned' mainframe Systems Programmers."

Consulting Services

Longpela Expertise can satisfy your Systems Programming consultancy needs. We can provide:

- **Locum services** - filling in for staff on leave.
- **Additional resource**—an extra Systems Programmer to help during peak demand.
- **General expert advice** - technical opinion and expertise for managers, auditors, architects and applications programmers. Your own independent mainframe expert—for an hour or a month.
- **Specialised technical knowledge** - in anything from programming exits that use control blocks to reading dumps using IPCS.

Training

We offer three innovative and cost effective mainframe training courses:

- **What On Earth is a Mainframe**—a four hour course that quickly and efficiently introduces the IBM System z mainframe to beginners. This course is tailored to your organisation, showing students how mainframes fit in your computing environment.
- **What On Earth is z/OS**—a four hour course covering the basics about z/OS and what runs on it. This course is also tailored to your organisation, teaching what your z/OS looks like.
- **Systems Programming Mentoring**—we can provide a senior Systems Programmer to mentor your junior staff. Our mentor will help them solve their problems, guide their self-study, and introduce them to Systems Programming disciplines and work practices.

Our Consultants

We have a network of leading mainframe technical specialists.

David Stephens, our lead Systems Programmer, has over 18 years technical mainframe experience in many different organisations and industries. He also has six years experience in systems software development and level 3 support with IBM.

Our Books

As part of our commitment to sharing our knowledge, we have published *"What On Earth is a Mainframe?"* An independent, easy-to-read introduction to mainframes, this will become the best friend of anyone new to mainframes.
